CLARK ForkLift Trucks PartsPro

The PartsPro System was developed in response to a shortage of large metal parts used to manufacture and fix lift trucks. The PartsPro System was developed to quickly and efficiently identify and locate the correct parts in a timely manner. There are 12-14 major location points on a Clark truck for the key numbers on the bottom of the frame of the truck. The location labels may be very descriptive. They may tell the part numbers and functions, or they may tell where the part is located on the truck. Clark Parts Plus is not a Parts Catalog. Clark parts plus is a Parts & Service Documentation Database. The program is designed to meet the needs of professionals who work with the information on Clark Forklift trucks. The Parts and Service information in the Clark Parts Plus system is not a parts catalog. Clark Parts Plus is only intended to be used for collecting parts and service information on Clark Forklift trucks. Each forklift truck is assigned a unique Clark Machine Serial Number. This program has the capability of dividing truck owners into three groups based on performance, usage and other criteria. This has created three levels of access. Standard Clark Forklift Customer Support: The standard Clark Forklift Customer Support has the ability to receive daily, weekly, monthly and quarterly email alerts. It is available 24 hours a day, 7 days a week. Standard Clark Forklift Repair Customer Support: This program has the same features as the Standard Clark Forklift Customer Support plus it will email the repair manager when a part or service is available. 5ec8ef588b
